

In Reproducing the 2006 Roundtable Map, We Found a Mistake in the 2006 Report

In trying to reproduce this 2006 map for the FLRA map and for the IM team map, we realized that the map did not match the table (i.e., the map areas in red, yellow, and green total >2.0m acres while the table totals 1.5m acres, the long-accepted number for "Roundtable priority areas")

2006 Roundtable Report, pp.8-9

Forests only:
1.5m acres

All fuels (grass and forests):
> 2 m acres
