

CFLR Ecological Indicator Progress Report

Project Name:

State:

Initial Desired Conditions as defined by the Collaborative (Fill this in)

Desired Conditions Target for Fire Regime Restoration: ____ change (relative to the desired condition) occurs across ____% of the landscape area by ____ date.

1. Please include 1-5 quantifiable desired condition statements upon which the above target is based. These statements should reflect the initial project goals as outlined in project proposals. Further guidance on what should be included in these statements is available in [the original Ecological Indicator Guidance](#) on page 4.

Desired Conditions Target for Fish and Wildlife Habitat Condition: ____ change (relative to the desired condition) occurs across ____% of the landscape area by ____ date.

1. Please include 1-5 quantifiable desired condition statements upon which the above target is based. These statements should reflect the initial project goals as outlined in project proposals. Further guidance on what should be included in these statements is available in [the original Ecological Indicator Guidance](#) on page 5.

Desired Conditions Target for Watershed Condition: ____ change (relative to the desired condition) occurs across ____% of the landscape area by ____ date.

1. Please include 1-5 quantifiable desired condition statements upon which the above target is based. These statements should reflect the initial project goals as outlined in project proposals. Further guidance on what should be included in these statements is available in [the original Ecological Indicator Guidance](#) on page 7.

Desired Conditions Target for Landscape Scale Invasive Species Severity: ____ (%) of the CFLR landscape area was restored by reducing invasive species severity (preventing, controlling, or eradicating targeted invasive species) to meet desired conditions by ____ date.

1. Please include 1-5 quantifiable desired condition statements upon which the above target is based. These statements should reflect the initial project goals as outlined in project proposals. Further guidance on what should be included in these statements is available in [the original Ecological Indicator Guidance](#) on page 8.

Scoring for National Reporting

Project-scale scoring

Each management action funded through CFLR will have its own project-level objectives that are designed to contribute to achieving Desired Conditions at larger scales. Project-scale scoring should reflect how well the results of an individual management activity met the objectives for that activity. As such project-scale scoring is conducted following completed management activities by the multi-party monitoring group at each Landscape.

- Good = 75% or more of implemented treatments result in measurable progress towards individual project-level Desired Conditions.
- Fair = 26% - 74% of implemented treatments result in measurable progress towards individual project-level Desired Conditions.
- Poor = 25% or less of implemented treatments result in in measurable progress towards individual project-level Desired Conditions.

Current Project-scale Evaluation (Based on and aggregation of the Collaborative's project level monitoring)

Ecological Indicators	Datasets and/or databases of records used	Project Level Good, Fair, Poor and (%) treatments resulting in measurable progress as defined above	Are you achieving your CFLRP objectives? (Y/N)	If NO, briefly explain...
<i>Fire Regime Restoration</i>				
<i>Fish and Wildlife Habitat Condition</i>				
<i>Watershed Condition</i>				
<i>Invasive Species</i>				

Landscape-scale scoring

Few (if any) CFLR-funded Landscapes propose to achieve landscape scale objectives through the mechanical treatment of every acre within their landscape boundary. Rather, the use of strategically placed restoration treatments should facilitate meeting these broader objectives. Scoring at this level reflects the degree to which individual Landscapes are resulting in Desired Conditions at broader spatial extent.

- Good = Expected progress is being made towards Desired Conditions across ____% of the CFLR landscape area.
- Fair = Expected progress is being made towards Desired Conditions across ____% of the CFLR landscape area
- Poor = Expected progress is being made towards Desired Conditions across ____% of the CFLR landscape area

“Expected progress” will be defined using 3, 5, 7 and 10-year benchmarks for each DC based on a percentage of the 10-year outcome specified in each Landscape’s proposal. To meet national reporting requirements on the Act, the 5, 10 and an additional 15-year reporting outcome are needed.

Current Project-scale Evaluation (Based on the Collaborative’s landscape scale monitoring)

Ecological Indicators	Datasets and/or databases of records used	Project Level Good, Fair, Poor and (%) landscape across which progress is being made towards desired conditions	Are you achieving your CFLRP objectives? (Y/N)	If NO, briefly explain...
<i>Fire Regime Restoration</i>
