Data Collection

Rocky Mountain Bird Observatory's Avian Data Center supplies researchers and resource professionals with links to methodology and datasheets used to study a wide variety of birds and their habitats at different times of the year.

We provide citations to influential published papers regarding avian ecology and conservation, monitoring, sampling techniques, decision support tools/management and statistical analysis that may be helpful.

You can download RMBO-endorsed protocols and datasheets below to assist you in data collection for your research or management project. If you would like to learn more about studying birds in your area, or get involved with RMBO's citizen science projects, visit our [Citizen Science page](#).

Datasheets

Integrated Monitoring of Bird Conservation Regions (IMBCR)

[2012 IMBCR Bird Datasheet](#)

[2012 IMBCR Vegetation Datasheet](#)

[2011 IMBCR Bird Datasheet](#)
