

Hosted by your CO SAF colleagues.

Can't see the Forest through the Trees? We'll show you how using ArcGIS.

ArcGIS for Forestry Training Workshop Thursday, April 24, 8:30 -11:30 am

The Learning Center at the Antlers Hilton Hotel, Colorado Springs, CO
 Held in conjunction with the Colorado Wyoming Spring Meeting

Please join us for a half-day workshop designed to help you discover new ways of working with ArcGIS in Forestry and Natural Resource Management. Basic topics are drawn from our 2-day Intro to ArcGIS for USFS with added topics from cartography, analysis, and animation (creating GIS movies!).

- What is GIS? How can I use it in forestry?
- Learn how to visualize, integrate, and analyze forest data
- Explore ways of identifying and monitoring changing patterns and conditions through time
- Take a new look at ways to share, analyze, and animate data for that extra "wow" factor

Workshop format and instructor:

This workshop combines fast-paced lectures and demonstrations, delivering a "tour" of ArcGIS tools and capabilities. Forestry data and examples are featured. Your Allpoints GIS instructor, Tom Dudley, has 15 years of experience designing and delivering ArcGIS training and support to the USFS, BLM, FEMA, EPA, and The Trust for Public Lands.

Sit back and enjoy a 6-pak:

Our 6-pak lab of ArcGIS workstations will be available for "hands-on" practice, discovery, and coaching.

Get started or renew your GIS skills here:

There are no prerequisites. This class is ideal for anyone interested in getting started or doing more with ArcGIS. Please check out these websites if you'd like to read ahead.

- www.esri.com – the latest updates, information, and examples of ArcGIS in action
- www.esri.com/industries/forestry – forestry examples, see what your colleagues are doing with ArcGIS
- www.arcgis.com – free trial including featured maps and capabilities
- www.allpointsgis.com – specialized training and support geared to forestry and NRM

About Allpoints: Founded in Denver in 1997, we specialize in developing and delivering ArcGIS training and support where land and natural resource management, resource development, and protection combine in increasingly complex and sensitive workflows. Services - ArcGIS training, coaching, programming, and support.

Here's what your colleagues have said about our classes:

- One of the best classes I've taken! ••
- The class exceeded my expectations! ••
- Your instructors are outstanding! ••
- Great short-cuts and time savings. •• I got something useful out of every chapter! ••
- Wow, what's next, I'm ready! •• I loved this class! •• I learned a ton! Thank you!! ••

Your training registration fee is donated to the CO SAF – thanks for joining us!
